### DETAILED ACTION

The restriction that was mailed on September 22, 2006 has been reviewed and it is now deemed that a second restriction is necessary because of the complexity of the claims as well as the nature of the invention.

#### *Election/Restrictions*

In view of Applicant's argument dated June 19, 2006, restriction to one of the following invention is required under 35 U.S.C 121:

- A. Claims 1-47 and 67-72 are drawn to a method and medium for configuring a plurality of software components of an intelligent device, classified in **class 709, subclass 220**.
- B. Claims 48-72 are drawn to the intelligent device itself, classified in **class 709, subclass 201**.

The inventions are distinct from each other for the following reasons: Inventions A and B are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope. See MPEP 806.05(j).

In the response filed October 23, 2006, Applicant contends that the previous restriction was improper. Furthermore, Applicant contends that there is clearly overlap in scope between the claims of invention A and the claims of invention B but failed to point out exactly which limitation in the claims are overlap. In fact, Applicant admits that

there are clearly differences in scope between the claims. See reply, page 20, second paragraph.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP section 808.02), restriction for examination purposes as indicated is proper.
